

AGIP BRAKE 5.1

AGIP BRAKE 5.1 is a synthetic, non siliconic very high performance fluid to be employed in brake circuits of bikes where a DOT 5.1 fluid is prescribed.

CHARACTERISTICS (TYPICAL FIGURES)

AGIP BRAKE 5.1

Viscosity at 100°C	mm ² /s	1,8
Viscosity at -40°C	mm ² /s	800
Boiling point	°C	270
Wet boiling point	°C	185
Colour	-	yellow
Mass Density at 15°C	kg/l	1,070

PROPERTIES AND PERFORMANCE

- AGIP BRAKE 5.1 has a low freezing point and so retains its correct viscosity even at very low ambient temperatures. With its exceptional boiling point, AGIP BRAKE 5.1 can be used with absolute safety, even when the parts concerned are subject to particularly high temperatures.
- It is noncorrosive to the metals used in brake circuits, it has good lubricating and antiwear properties and it is compatible with rubber components.

WARNING

Store brake fluid only in its original container. Keep containers clean and tightly closed to prevent absorption of moisture.
